

SPARKY SUMS 1

TO COMPLETE THIS ACTIVITY YOU NEED:

Paper or card

Scissors

Pencil and paper

BEFORE YOU START: Use paper/card and scissors to cut out **10** circles similar in size to the small blank circles in the firework below*.

Write the numbers **0** to **9** in each of your circles and use them to complete your firework below.

* a template of number circles is available at dig1t.com

Arrange each of the numbers **0** to **8** in the circles of the Catherine Wheel so that the sum of each line of three numbers is **equal**.

Dig's Ideas:

Draw the fireworks with your solutions on separate sheets of paper and then colour and decorate them so that they look like a firework. You could use sparkly pens and/or glitter.

Try making up your own Sparky Sum Fireworks to challenge your classmates with. Make sure you test them so they work out correctly!
