

NUMBERS THAT MAKE 8

TO PLAY THIS GAME YOU NEED:

AIM: To make the most lines of 3 with your coloured counters - horizontally, vertically or diagonally.

HOW TO PLAY: Pick a set of coloured counters each and decide who plays first. Players will take turns. On your turn, pick 2 numbers - one number from each grid - that add up to 8. Cover up both numbers with 2 of your coloured counters. Continue until both grids are fully covered.

6	1	
7	5	
2	3	0
5	2	4
7	3	6
4	1	8

8	4	0
5	4	6
7	3	1
5	2	1
7	6	3
	2	

Dig's Questions:

1. 8 subtract 5.
2. What is the answer to 8 minus 4?

Challenge:

Try to improve this skill using number cards up to 8. Get an adult to turn over one card at a time while you call out the number needed to make 8. Time yourself and do it regularly to improve your speed.

Dig's Tips:

“To make the game easier, use visual aids such as counters or number lines to begin with. Play the game regularly to master it without visual aids. Once this is mastered, move on to the challenge.”

Years 1 to 6 - Maths Activities & Games

Over 400 curriculum-aligned maths games providing an engaging and fun way for children to practise the maths skills learned in class

- Supporting **every Number target** in Year 1 to 6
- **Easily incorporated** into existing lesson plans
- Game format enables children to play with maths **together**
- Use in class or as home-learning exercises
- Available in year-group, key stage, and individual topic packs

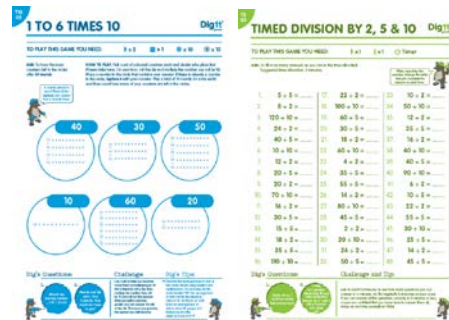

Times Tables & Division Activities & Assessments

Downloadable PDF resource!

A comprehensive and engaging system of games and assessments that steadily progress children through the times-tables.

- Incorporates division alongside multiplication activities
- Regularly refers to previously completed tables in order to constantly refresh knowledge
- Assessments and Progress trackers are included
- A resource that families can also access!

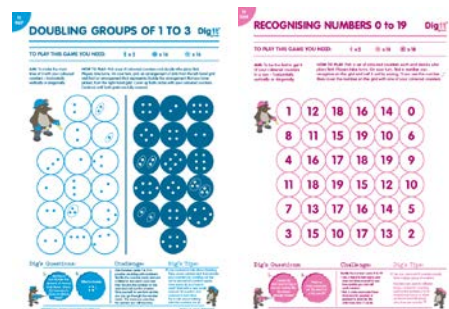

Reception Games & Activities

Downloadable PDF resource!

Helping Reception teachers make children's introduction to maths an enjoyable and fun experience.

Focusing on:

- Number recognition
- Counting & estimating
- Simple addition & subtraction
- Number bonds

Dig1t Deals - Metrics card game (age: 7+)

A card game that requires players to convert different units of measurement as well as practising children's multiplication and division skills.

Measurements include decimals and fractions!

- **Length:** Millimetres (mm), centimetres (cm) and metres (m)
- **Weight:** Kilograms (kg) and grams (g)
- **Capacity:** Millilitres (ml) and litres (l)
