

Encouraging maths practice at home

For schools that would like to encourage regular and fun maths practice at home, Dig1t Games provide a free, downloadable document of maths activity ideas that will fit easily into evening and weekend routines.

The activity document is:

- packed with ideas of maths activities to play with Number Cards, Counters and Dice.
- quick, convenient and easy to use.
- supportive of the Early Years and Primary National Curriculum targets.

We have an [editable letter to parents](#) available on our website that suggests using the maths activities as a daily exercise that will help develop and maintain children's maths skills.

Raising funds with the Dig1t maths activities

The simple resources required for the activities are often missing at home, so we have pre-collated 'Resource Bags' available on our website.

A Resource Bag contains:

- 2 dice
- Number cards from 0 to 20
- 40 counters in 2 colours
- 4 playing pieces

Resource Bags would cost £5 each (£4 + delivery) when bought individually, but with discounts available on 31+, 61+ and 100+ bags, schools can provide them for £4 each and raise some extra funds.

The table below shows the funds that could be raised.

Resource Bags ordered	Total cost per bag	Cost (inc delivery)	Funds raised (£4 per bag)
31	£3.50	£117.00	£7.00
61	£3.00	£191.50	£52.50
100	£2.70	£278.50	£121.50

We constantly aim to provide effective maths resources that make the most of children's affinity for playing games and enable them to gain regular practice.

We would welcome your thoughts or suggestions on any of the activities – if you'd like to send any feedback, our email address is: office@dig1t.com.
